

# Cleaning Accessories

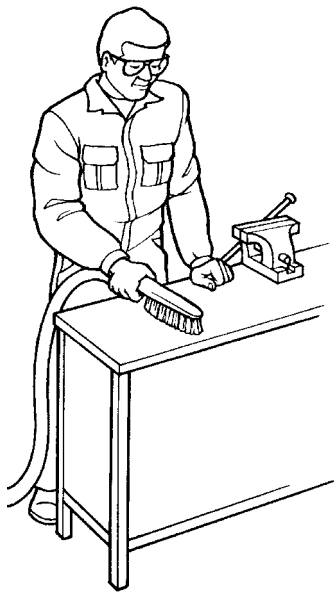

For the best results when cleaning, it is necessary to have the right equipment and to use it in the correct way. It is therefore a prerequisite that a variety of different accessories are available for different tasks.

32 mm cleaning accessories are recommended when very light tools are required ie: office cleaning.

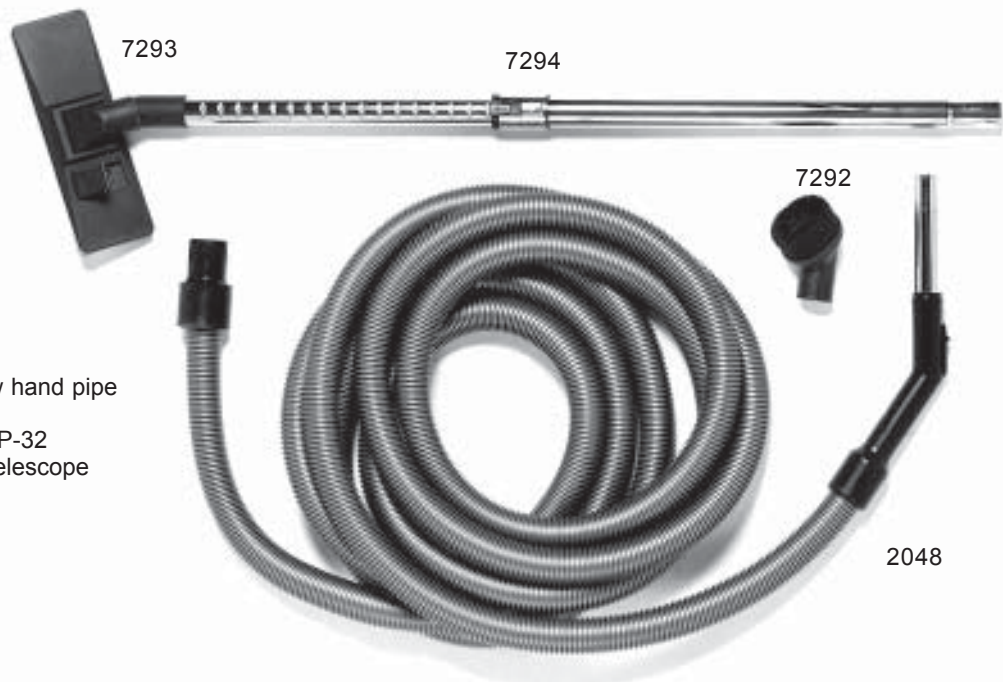

38 mm cleaning tools are ideal in most cases, they combine good capacity with ease of handling. Everything is available, from light tools such as wands in aluminium and tools in plastic and rubber to sturdy wear resistant wands in steel and cast aluminium floor tools.

50 mm cleaning accessories are used for very heavy cleaning. Aluminium wands, large wheels on the floor tools and the ERGO-grip are several of the details which allow the accessories to be used easily despite their size.

76 mm accessories are used for different types of material transport.

## Cleaning Accessories $\varnothing$ 32 mm
